Re: CC Docket 94-102
Quarterly TTY Implementation Report:
Edge Wireless Licenses, LLC.

Dear Ms. Salas:

On behalf of Edge Wireless Licenses, LLC. ("Edge") this letter is submitted to report the status of the company's implementation of the capability to transmit 911 calls from text telephone (ATTY@) devices.

Edge is a digital wireless carrier operating personal communications services that recently commenced service in certain basic trading areas (BTAs) in rural Oregon, Idaho, and California. In prior TTY Reports, Edge indicated that it planned to upgrade its current TDMA network to an MTX-10 switch from Nortel Networks, Inc. ("Nortel") which, when installed, would make its system capable of transmitting E911 calls from TTY devices. However, Edge is in the process of transitioning from TDMA to a GSM network. At this time, Edge is in the process of determining whether and when it would be practical to upgrade its current TDMA system, or, focus all its resources toward meeting the TTY 911 requirement upon completion of its transition to GSM. In addition, Edge also recognizes that TDMA TTY compatible handsets may not be commercially available by June 30, 2002. The combination of these and other factors may necessitate Edge requesting a waiver and extension of the June 30, 2002 deadline by which digital wireless service providers must be capable of transmitting 911 calls using TTY devices.

Should any questions arise with respect to this matter, please feel free to communicate directly with the undersigned.

Very truly yours,

/s/

Todd Slamowitz
